# Insight Portal™ | Omega

INSIGHT PORTAL™ | OMEGA CAPABILITIES

RECORD MANAGEMENT

Create Nodes and Links seamlessly, to build relationships between your data more effectively.

SEARCH

Insight Portal Search provides you with a robust and intuitive search experience.

VISUALIZATION

View and expand Nodes and Links associations with one click

REPORTING DASHBOARD

Gain insights of your data with Pie and Bar chart, and Data Table

DOCUMENT SHARING

Upload photo, document or field report directly to the record of interest.

VERSION HISTORY

Track and manage changes offering a comprehensive view of the evolution of the data.

The Insight Portal™ | Omega is a browser-based, Microservices Architecture and Containerized technology for Investigators, Analysts and Field Operators that streamlines data collection and provides tactical link visualization to expedite the intelligence cycle and extend critical information to operational users on the go.

Why Insight Portal™ | Omega

Building on the maturity of our Origin platform, Omega was developed in collaboration with our partners, clients and market demand. Omega is the next generation of our Insight Portal™ offerings. You now have a choice of database, API connectors to ingest multiple data sources, an intuitive schema designer, along with a microservices architecture to prepare for the future.

What We Do

Insight Designer

Introducing Insight Designer, part of Insight Portal™ | Omega offering. Insight Designer is a powerful tool for data/schema modelling through Node and Link design, enabling users to formulate relationship rules effortlessly.

- Data Schema Control

Insight Designer empowers you to create a robust data schema s using a variety of field types, including text, numbers, time-based information, and file uploads.

- Seamless Node and Link Administration

Insight Designer offers unparalleled flexibility to manage your Node and Link data.

- User-Friendly Interfaces

Our user-centric approach ensures that the Insight Designer interface remains intuitive and easy to navigate.

Insight Portal™

Introducing Insight Portal™, an essential record management portal within the Insight Portal Omega offering.

- Effortless Record Creation and Access

With Insight Portal, creating and accessing records has never been easier.

- Enhanced Node and Link Creation

Insight Portal has familiar and easy to use features enabling you to build and manage relationships between your data more effectively.

- Powerful Data Retrieval with Insight Search

We've integrated the industry-standard search engine, Elasticsearch, into Omega to provide you with a robust and intuitive search experience.

- Dynamic Dashboard for Data Visualization

Get deeper insights into your data with our range of chart offerings, including Pie, Donut, Bar, and Datatable visualizations.

- Access Restriction Controls

Our comprehensive data access control toolset, demonstrates the importance of data security to our users.

Increase operational efficiency and expedite intelligence driven decision making with the powerful, cost-effective Insight Portal™ | Omega.
