

OIMonitor/

Bring the world's  
data **to you.**

Open source intelligence monitoring and alerting for modern investigations.

When it's your responsibility to identify and stop threats, you don't have time to collect and search across the world's open data. OIMonitor™ lets you broaden your scope and monitor on your terms—being alerted to relevant keywords so you can identify threats before they become problems.

## FEATURES

### Access complete data

Complete data access with every piece of intelligence available—screenshots, raw artifacts, etc.

### Customize your situational awareness

Customizable monitoring scope and sources to ensure the most relevant case information.

### Access historical data

Access to historical data archive from 2011–present.

### Extend your reach

Scalable automation for ease of use and real-time situational awareness.

OIMonitor puts the  
world's open data  
at your fingertips.

**Get started with a free demo and 30-day license.**

Go beyond the profile. Let us show you how OIMonitor can quickly scale up your investigations.

## The good guys need the right tools to win.

U.S.-based and dedicated to providing our allies with every advantage, we combine decades of in-the-field investigative experience with the bleeding-edge tactics and techniques to reduce the friction of sourcing, collecting, and sorting open source data.

## Our stuff works with your stuff.

Many of our tools are built with RESTful APIs and to integrate with today's leading investigative and data platforms, like Maltego, Proofpoint, and Kaseware. We even have utilities to free your own data and make it more usable across platforms.

SHADOWDRAGON

**Getting answers is easy with the right software and data.**
